Assembly

1. Insert the solid, L-shaped support assembly (item 1) into your 2" x 2" receiver hitch, and secure with the 5/8" hitch pin and hairpin cotter supplied (items 4 & 5). The short leg of the "L" can be oriented in the upward or downward position to achieve desired hitch height.

2. Assemble Tri-Ball Mount (item 2) to the support assembly using two 5/8" ring pins (item 6) and two 1/4" snapper pins (item 7). The Tri-Ball Mount can be mounted with the bolt hole on top or bottom to achieve desired hitch height.

3. Assemble Adjustable Tri-Ball Hitch (item 3) into the 2" x 2" tube on the Tri-Ball Mount, with the desired ball size on top. Secure with a 5/8" ring pin (item 6) and a 1/4" snapper pin (item 7).

4. Once the desired height is achieved, insert the 1/2" bolt (item 8) into the tapped hole in the Tri-Ball Mount. Tighten bolt to remove any slack between the Tri-Ball support and mount.

WARNING
 Do not exceed the rating of the lowest-rated component in your towing package.

WARNING
 Maintain adequate vertical (tongue) load to properly control the trailer (generally 10%), but do not exceed the above-rated capacities.

NOTE
 Inspect hitch before each use. Replace any worn or damaged parts. Always use safety chains when towing.
