NOTICE

Visit www.curtmfg.com for a full-color copy of this instruction manual, as well as helpful videos, guides and much more!

Before you begin installation, read all instructions thoroughly.

Proper tools will improve the quality of installation and reduce the time required.

This installation requires:

- Lowering of the spare tire
- Use of existing weldnuts

Periodic inspection of the trailer hitch should be performed to ensure all mounting hardware remains tight and structural components are secure.

To help prevent damage to the product or vehicle, refer to the specified torque specifications when securing hardware during the installation process.

SAFETY INSTRUCTIONS

Safety glasses should be worn at all times while installing this product.

ASSEMBLY

Parts List

Item	Qty	Description
1	6	Hex bolt, M14-1.5 x 40mm, CL10.9
2	6	Conical-toothed washer, 9/16"

Step 1

Lower the spare tire from inside the vehicle by using the tools provided with the vehicle, located under storage compartment. Set aside for reinstallation in Step 3.

Clean all weldnuts, where applicable.

Step 2

Raise the trailer hitch into position and loosely install three M14 hex bolts (#1) and conical-toothed washers (#2) into the existing weldnuts on both sides of the vehicle. Torque M14 bolts to 136 lb-ft.

Step 3

Raise the spare tire back into place with the vehicle tools provided.

Note: While raising the spare tire back into place, inspect the hitch and tire to make sure there is adequate clearance. If additional clearance is needed between the hitch and tire, push the tire forward while raising it.
